Skills

React	NodeJS	Express	JQuery
JavaScript ES6	CSS3	SASS	MongoDB

Projects

Athens Middle School (AL) Band Library / Freelance

Commissioned by Steve Williams, director of bands on July 21, 2019. Built using ReactJS, Express, MongoDB/Mongoose and using the Bootstrap CSS framework, this application allows for easy entry and reference of the bands sheet music library.

Maintenance Manager / Final Class Project

This project was built using ReactJS, Express, MongoDB/Mongoose, PassportJS for user authentication and used custom CSS. Will was responsible for formatting data from the database, building modals, wireframing the layout of the application and all CSS.

Train Arrival Scheduler / Example of Weekly Class Project

This clean and simple application that incorporates Google Firebase to host arrival and departure data. Data on departure times is manipulated with Moment.js. This website provides up-to-date information about various trains the user can choose to track.
